THREE MORE SPASTICS WERE BORN TODAY

There were 75,000 spastics in Britain yesterday. But three more were born today. Within a week there will be another 20, by this time next year another 1,000.

Cerebral palsy, caused by damage to the part of the brain controlling movement, means they face a life of heart-breaking handicaps.

They need the support of the Spastics Society. The Spastics Society needs support from you. It has already built over 100 schools and centres, but this isn't nearly enough. The tragic waiting lists grow longer daily.

Please help us to build more. Please help our medical research. To why another spastic baby is born every eight hours. Please send a donation to—
